

Definisjon Et rektorrom er et ikke-tom mengde (dementere kaller vi Vektorer), Sammen m/ to operasjoner t og gange med skalarmultiphikasjon. Disse tilfredsstiller absign 1-10 over. Elis 1 Polynomer av grad & n. Elementiene es pa formen  $\frac{f(t)}{f(t)} = \frac{a_0 + a_1 t + a_2 t^2 + \dots + a_n t^n}{R}$   $\frac{dv}{g(t)} = a_0 + b_1 t + b_2 t^2 + \dots + b_n t^n$  $\frac{1}{9(t)} = b_0 + b_1 t + b_2 t$   $\frac{1}{5} + \frac{1}{9(t)} = b_0 + b_1 t + b_2 t$   $\frac{1}{5} + \frac{1}{9(t)} = b_0 + b_0 + (a_1 + b_1) t + \dots + (a_n + b_n) t^n$
